**“POWER TO POLE
Solar Roof Top”**

Mechsol is powering a quiet, clean and safe energy revolution by offering robust, easy to install and low maintenance Photovoltaic (PV) Solar Panels. Solar energy is a sensible choice for all those who care about nature and environment. It is renewable, green and allows you to reduce your carbon footprint as it doesn't release any harmful pollutants to the atmosphere. It is affordable and cost effective. What's more, you can stop depending on the irregular Government supplies, reduce your electric bills and even earn by selling back to the government grid. Come, let us join the solar revolution today.

Get paid for the excess electricity

With Government's Net Metering initiative, you can pump back the excess electricity generated from your roof top solar panel to the Government grid and drastically reduce your electricity bills. Your meter will run backward when you share the excess electricity allowing you to earn from your Solar Panels.

Advantages 1 KW Solar System

Generates 4 units a day

Requires only 12 sq m shadow free roof space

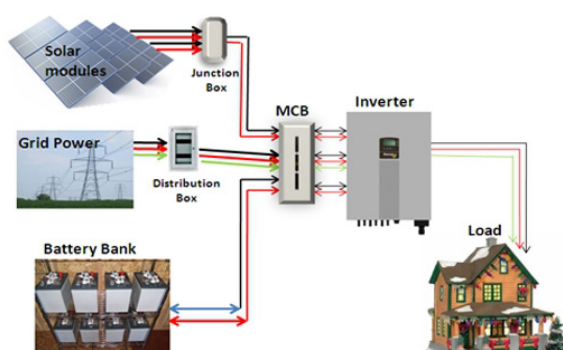

Panels come with 25 year warranty

Benefits

- Reduced electric bills and increased savings
- Apartments, institutions and big buildings can now say good bye to Diesel Generators
- Eliminate diesel and running costs
- Inverters for small applications can be replaced with Solar PV Panels

Our Offerings

Mechsol is an ISO 9001:2008 certified company. We are committed to provide quality products using latest technology, understanding your requirements and being flexible to your needs. In the process we wish to win your trust and emerge as a leader.
